Background:

CLCP1 (CUB, LCCL and coagulation factor V/VIII-hom ology domains protein 1), also known as DCBLD2 (di scoidin, CUB and LCCL domain containing 2) or ESD N, is a 775 amino acid single-pass type I membrane protein that contains one CUB domain, one LCCL do main and one F5/8 type C domain. Expressed at hig h levels in heart, testis and skeletal muscle, CLCP1 is thought to regulate vascular smooth muscle cell (VS MC) proliferation and remodeling and may be involved in the transformation and metastasis of various cancers, such as metastatic lung cancer and gastric car
