

NCAPD3 抗原（重组蛋白）

中文名称： NCAPD3 抗原（重组蛋白）

英文名称： NCAPD3 Antigen (Recombinant Protein)

别 名： CAPD3; hcp-6; CAP-D3; hHCP-6; hCAP-D3

储 存： 冷冻（-20℃）

相关类别： 抗原

概 述：

Fusion protein corresponding to C terminal 250 amino acids of human NCAPD3

技术规格：

Full name:	non-SMC condensin II complex, subunit D3
Synonyms:	CAPD3; hcp-6; CAP-D3; hHCP-6; hCAP-D3
Swissprot:	P42695
Gene Accession:	BC011408
Purity:	>85%, as determined by Coomassie blue stained SDS-PAGE
Expression system:	Escherichia coli
Tags:	His tag C-Terminus, GST tag N-Terminus
Background:	Condensin complexes I and II play essential roles in mitotic chromosome assembly and segregation. Both condensins contain 2 invariant structural maintenance of chromosome (SMC) subunits, SMC2 and SMC4, but they contain different sets of non-SMC subunits. NCAPD3 is 1 of 3 non-SMC subunits that define condensin II.
