

## 小鼠抗 HABP2 单克隆抗体

中文名称： 小鼠抗 HABP2 单克隆抗体

英文名称： Anti-HABP2 mouse monoclonal antibody

别名： hyaluronan binding protein 2; FSAP; HABP; PHBP; HGFAL; NMTC5

相关类别： 一抗

储存： 冷冻（-20℃）

宿主： Mouse

抗原： HABP2

反应种属： Human

标记物： Unconjugate

克隆类型： mouse monoclonal

### 技术规格

#### Background:

This gene encodes a member of the peptidase S1 family of serine proteases. The encoded preprotein is secreted by hepatocytes and proteolytically processed to generate heavy and light chains that form the mature heterodimer. Further autoproteolysis leads to smaller, inactive peptides. This extracellular protease binds hyaluronic acid and may play a role in the coagulation and fibrinolysis systems. Mutations in this gene are associated with nonmedullary thyroid cancer and susceptibility to venous thromboembolism. Alternative splicing results in multiple transcript variants, at least one of which encodes a prep

	roprotein that is proteolytically processed.
<b>Applications:</b>	WB, IHC
<b>Name of antibody:</b>	HABP2
<b>Immunogen:</b>	Fusion protein of human HABP2
<b>Full name:</b>	hyaluronan binding protein 2
<b>Synonyms:</b>	FSAP; HABP; PHBP; HGFAL; NMTC5
<b>SwissProt:</b>	Q14520
<b>IHC positive control:</b>	Human breast tissue
<b>IHC Recommend dilution:</b>	500-2000
<b>WB Predicted band size:</b>	63 KD
<b>WB Positive control:</b>	HepG2, MCF7 and A549 cell lysates
<b>WB Recommended dilution:</b>	200-1000
